

Shiksha Niketan

HELLO

AUGUST

INTERNATIONAL YOGA DAY

The practice of yoga asanas develops strength and flexibility, while soothing your nerves and calming your mind

The flexibility and strength of the Shiksha yoga exponents was exhibited on yoga day

Take care of the Earth and she will take care of you.

The importance of the environment and the need to conserve it is an awareness that has to be instilled in young minds. On world environment day the grade 7 students performed a skit about the perils of desertification and deforestation.

Protecting our planet not only involves planting more trees to combat the effects of pollution and global warming prevention but also involves adopting sustainable living habits. Eco-friendly practices, such as recycling, reducing waste, and using renewable energy sources, play an instrumental role.

Introduction to Generation

Teaching children about the concept of generations and their responsibilities can be both enlightening and engaging.

My Family:- "Family is Everything"
In this activity the kindergarteners of Shikshalearnt not only the value of a family but also to identify its members.

The concept of opposites- particularly 'thin and fat' was taught to the kindergarteners with an enjoyable activity.

Artistic Gallery

The Budding artists of Grade 6, 7 and 8 showcased their immense talent in Origami making, Puppet Show and Fabric painting competitions respectively

Explore Science

The invention of wheel by early man and its uses was presented by the grade 3 students

The inquisitive scientists of grade 3 conducted an experiment involving an apple, lemon and salt water. The students observed that dipping an apple slice in milk, water and lemon slows down the process of the apple turning brown. Interesting, Isn't it?

Is it possible to hold the whole galaxy in our hands? The Shiksha students made this possible by fitting in an entire galaxy in a glass jar. Kudos!

Activities to comprehend the celestial moon and its various phases using oreo biscuits was done by grade 6. With this creative activity the students grasped the concept of waxing and waning moon.

The Geographical importance of North America was grasped by the kids with the help of maps and white and green cotton.

**Under 14- Boys Volleyball IInd place.

Our Shiksha teachers enacted a thoughtful presentation on the importance of trees and their growth requirements in honor of Environment Day. Here are the key points highlighted:

*Importance of Trees:.
They provide oxygen, absorb carbon dioxide, and mitigate climate change.*

*Needs for Growth:
Adequate sunlight and water are essential for tree growth.*

This presentation served as a reminder of our responsibility to nurture and protect our natural environment.

MADE FUN

Math is always fun when there are interesting activities involved. The Topic of 'Place Value' was simplified to the students by engaging them in an engrossing activity.

Literary club is a paradise for thinkers, readers and writers. The Shiksha literary club is a forum for the budding poets and authors to share their insights and talent. Caption writing, riddles, tell a tale, drawing and solving puzzles were few of the activities conducted by the literary club to encourage students to think out of the box and develop a flair for the language.

Thank You
